Biometric Authentication

Convert your ordinary vehicle into an Intelligent vehicle

About Device

Smart Ignition System

Smart Ignition System is an intelligent device developed by Ample Trails which prevent unauthorized use of your vehicle. We can register multiple drivers also in this device who can use the vehicle. Driver needs to punch his finger to start the vehicle and it allows for ignition only if driver is authorized otherwise it blocks the ignition permission.

How to Install

Installation of this device is very simple. You just need to provide 12 - 48 DC voltage to this device and connect its remaining two wires with ignition wire of your vehicle and the device is ready to use.

Easy
Installation

Easy Reports

You can get the record of all ignitions and check how many times, on which date and at what time your vehicle was started.

Compatible With 12 – 48V Vehicles

Supports Most of Common Vehicles Like
